Commit to global sustainable development and practice ESG strategies

Nan Fong actively pursues the demand for international greenhouse gas reduction and conducts inventory of greenhouse gas emissions in accordance with ISO 14064-1 : 2018. We hope to be committed to greenhouse gas reduction work in the future and is expected to slow down the global warming trend and comply with the national self-determination NDC contribution reduction goals and fulfill our social responsibilities.

Nan Fong greenhouse gas reduction target

Short term

25%
reduction
in 2030

Medium term

40%
reduction
in 2040

Long term

Zero emission
in **2050**

- E**
